

KEEPING A RECORD OF YOUR BLADDER FUNCTION

HOW TO KEEP YOUR BLADDER DIARY

The main purpose of a bladder diary is to document how your bladder functions. A diary can give your health care provider an excellent picture of your bladder functions, habits and patterns. The diary is first used as an evaluation tool. Later, it is used to measure your progress. Please complete a bladder diary every day for 2 days and bring it with you to your first appointment.

In the beginning, continue to go about your daily life as normal. You are making a written record of your normal bladder patterns so please avoid making any changes in your bladder routines. Your diary will be much more accurate if you fill it out as you go through the day. It can be very difficult to remember at the end of the day exactly what happened in the morning. The diary plays an important part in your health care provider's ability to understand your problem and should not be taken lightly.

Also, if possible, remember to change your pad or clothing whenever you feel yourself leaking or notice that you are damp. A dry pad or pair of underwear will increase your awareness of problems and improve the accuracy of your record.

INSTRUCTIONS

Column 1 - Type & Amount of Fluid Intake & Food Intake:

Record the type and amount of fluid you drank.

The type and amount of food you ate.

Note the hour you went to sleep and when you woke up for the day.

Column 2 - Amount Voided (Urinated):

Place a SM,MD,LG, or the measured amount of urine in the box with the appropriate time interval each time you urinate during the day. You do not need to fill in ounces unless specifically instructed by your health care provider.

SMALL= seemed like small amount or urinated "just in case".

MEDIUM= seemed like a measuring cup would nearly run over.

LARGE= seemed like the amount you urinate when you first wake up in the morning.

Column 3 - Amount of Leakage:

SMALL= drop or two of urine

MEDIUM= wet underwear

LARGE= wet outerwear or floor

Column 4 - Activity with Leakage & Was Urge Present:

Describe the activity associated with the leakage i.e. coughed, heard running water, sneezed, bent over, lifted something or had a strong urge. Describe the urge sensation you had to go as

MILD= first sensation of need to go.

MODERATE =stronger sensation or need.

STRONG =need to get to toilet, move aside!

Note: If pad change was needed, record number used during the day at the bottom of the page.

Daily Voiding Diary
